

EXPERIENCE THE EXCEPTIONAL

ENVIRONMENT POLICY

AESSEAL[®] manufactures a range of mechanical seals & supporting equipment designed to help customers meet their environmental and safety obligations by preventing leakage of fluids and gases from rotating equipment. The Company's manufacturing activities are supported by a refurbishment service for mechanical seals and pumps.

The Company recognises the importance of environmental issues and takes a holistic view of the impact of its activities on the environment.

AESSEAL[®] is committed to the implementation of an Environmental Management System in accordance with BS EN ISO 14001 that identifies and addresses the main environmental impacts of the Company's activities and in particular commits to:

- Protect the environment and prevent pollution from its activities, products and services.
- Fulfil all applicable environmental legal and other compliance obligations.
- Continual improvement of the environmental management system to enhance environmental performance.
- Provide adequate resources to achieve the above

The Company's Quality, Safety, Environment, Assurance and Learning (Q-SEAL) Manual describes the management system used to set objectives and control, review and improve environmental performance and is implemented via procedures, work instructions and/or training, as appropriate. This manual, together with current environmental objectives will be made available to interested parties on request.

This policy will be review on an annual basis as part of the Management Review and will be reissued only in the event of update.
